EDUCATION

University of Utah — B.S. Software Development

Salt Lake City, UT | Expected December 2026

Coursework: Algorithms & Data Structures, OOP, Web Development, Database Systems, Human-Centered Design

SKILLS

Languages: Python, JavaScript, Java, C#, SQL, HTML/CSS

Frameworks: React, .NET, Node.js

Tools: Git, Firebase, Figma, Salesforce, Adobe Suite, Agentic Coding

EXPERIENCE

Milliman, Inc.

Software Developer Intern — Financial Risk Management | Chicago, IL | May 2026 – Aug 2026

- Developing software for financial risk management systems at a leading global actuarial and consulting firm, gaining hands-on exposure to financial technology workflows and enterprise-scale codebases.
- Collaborating with senior engineers to design, implement, and test software components under production-level standards, applying C# and .NET remoting with TCP for network communication.
- Working within a cross-functional engineering team on systems supporting risk modeling and trading operations.

Catholic Answers

Information Technology Intern | El Cajon, CA | May 2025 – July 2025

- Evaluated 5+ database analytics platforms (Snowflake, Tableau, CesarAI) and delivered a recommendation aligned with organizational goals and budget constraints.
- Designed and deployed Salesforce dashboards with Directors of Marketing and Development, enabling real-time tracking of donor activity and sales performance metrics.
- Participated in cross-functional strategic meetings, gaining exposure to enterprise-level workflows and stakeholder communication.

Hello!

Student Developer | Salt Lake City, UT | Jan 2025 – July 2025

- Built a Python desktop application capturing dual-channel audio for transcription workflows, delivering a complete end-to-end solution from requirements through deployment.
- Evaluated 3+ transcription APIs (OpenAI Whisper, AssemblyAI) across accuracy, latency, and cost to select the optimal integration.
- Implemented API integration and user-friendly GUI, reducing manual transcription overhead.

PROJECTS

TateAI – AI-Powered Study Assistant | Python, React, APIs | Dec 2025

- Built an AI-driven study assistant with real-time speech transcription enabling low-latency voice conversations with an AI tutor focused on class-specific content.
- Integrated speech-to-text and conversational AI APIs with context-aware prompting to guide students through explanations and concept reinforcement.

Personal Portfolio Website | JavaScript, HTML, CSS | Fall 2025

- Designed and developed a responsive single-page portfolio with modern UI/UX: glassmorphism effects, particle animations, and a custom vertical navigation sidebar.
- Engineered mobile-responsive hamburger menu, scroll progress indicator, and section-based active state tracking for intuitive navigation.
