EDUCATION

Bachelor of Science: Software Development
University of Utah

Salt Lake City, UT
Expected December 2026

Related Coursework Obj-Oriented Programming, Algorithms, Data Structures, Web Development, Design
Human-Centered Systems

Programming Languages: Python, Java, JavaScript, React, C++

Technical Skills: Anthropic, Claude, Cursor AI, Firebase, Figma, Adobe Suite, Salesforce, BigCommerce, Data Analytics, Microsoft Suite, Rippling, Docker, Django

EXPERIENCE

Catholic Answers

El Cajon, CA

Information Technology Intern

May 2025 – July 2025

- Evaluated 5+ database analytics platforms (including Snowflake, Tableau, and CeasarAI) to recommend an optimal solution aligned with organizational goals and budget constraints
- Collaborated with Directors of Marketing and Development to design and deploy Salesforce dashboards tracking monthly donor activity and sales performance metrics
- Participated in cross-functional strategic meetings and collaborative projects, gaining exposure to enterprise-level development workflows and team dynamics

Hello!

Salt Lake City, UT

Student Developer

January 2025 - July 2025

- Designed and built a Python-based desktop application capturing dual-channel audio (microphone input and system output) for transcription workflows
- Conducted comparative analysis of 3+ transcription APIs (including OpenAI, Whisper, and AssemblyAI), evaluating accuracy, latency, and cost-effectiveness
- Delivered end-to-end software solution from requirements gathering through deployment, implementing API integration and user-friendly GUI interface

TECHNICAL PROJECTS

TateAI = AI-powered Study Assistant - Software Developer - *Python, JavaScript, React, APIs* December 2024 – Present

- Designing and developing an AI-driven study assistant that uses real-time speech transcription to enable natural, voice-based conversations with an AI tutor
- Integrating speech-to-text and conversational AI APIs to support low-latency, multi-turn dialogue focused on class-specific topics
- Implementing context-aware prompting to guide students through explanations, clarifications, and concept reinforcement

Personal Website - UI Designer - *JavaScript, HTML, CSS*

Fall 2025

- Designed and developed a responsive single-page portfolio website using HTML, CSS, and JavaScript, showcasing projects and technical skills with modern UI/UX principles
- Engineered custom vertical navigation sidebar with mobile-responsive hamburger menu, scroll progress indicator, and section-based active state tracking for intuitive site navigation
- Applied modern design aesthetics including gradient backgrounds, glassmorphism effects, and particle animations to create visually striking interface while maintaining accessibility standards
